

European Research Council
Established by the European Commission

ERC Frontier Research in Social Sciences and Humanities

This series of factsheets provides an overview of the projects funded by the European Research Council (ERC), in the Social Sciences and Humanities domain, in the H2020 Framework Programme (2014–2020)

Individuals,
Markets and Organisations (SH1)

Institutions, Values,
Environment and Space (SH2)

The Social World,
Diversity, Population (SH3)

The Human Mind
and Its Complexity (SH4)

Cultures
and Cultural Production (SH5)

The Study
of the Human Past (SH6)

Data as of December 2021

SH

Individuals, Markets and Organisations (SH1)

This fact sheet provides an overview of the projects funded in 'Individuals, Markets and Organisations' panel in the Social Sciences & Humanities (SH) domain (see [ERC panel structure](#)). The projects were funded under the Starting Grant (StG), Consolidator Grant (CoG) and Advanced Grant (AdG) calls launched in the H2020 Framework Programme (2014–2020)*

1404 applications
(2.6% of total)

193 projects funded
(2.9% of total)

76 projects
(€95M)

66 projects
(€97M)

51 projects
(€84M)

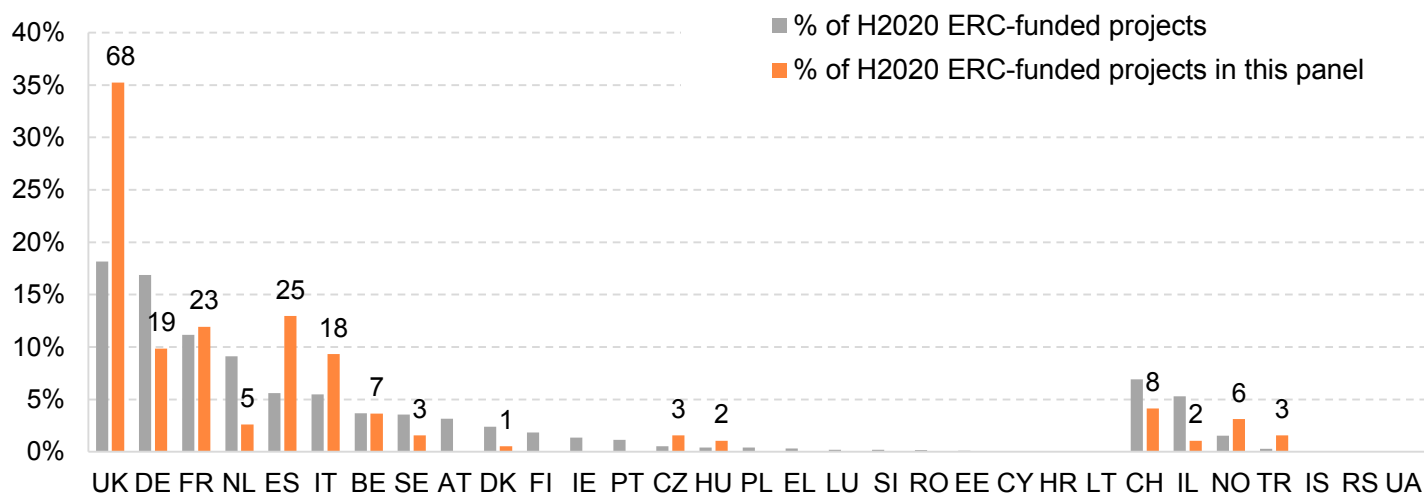

47 female grantees
(24% of grantees in this panel)

€276 million budget

Distribution of ERC-funded projects in EU Member States and Associated Countries in H2020

The 193 funded projects (numbers in the graph) are in 11 EU Member States and 4 Associated Countries (ACs)

Host institutions with ≥8 funded projects

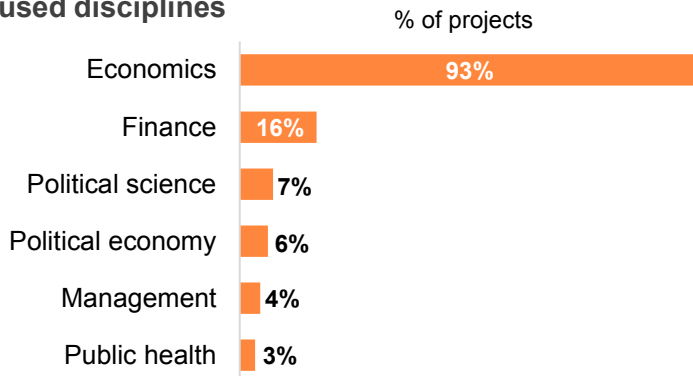

Country of origin of grantees other than EU or ACs (≤3 grouped together)

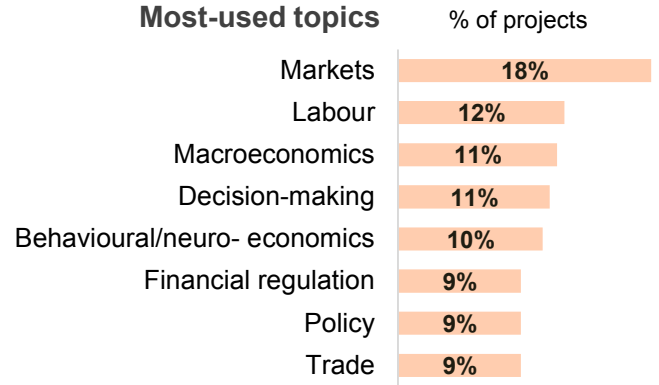

*Data as of December 2021

Scientific landscape of ERC-funded projects in this panel

Most-used disciplines

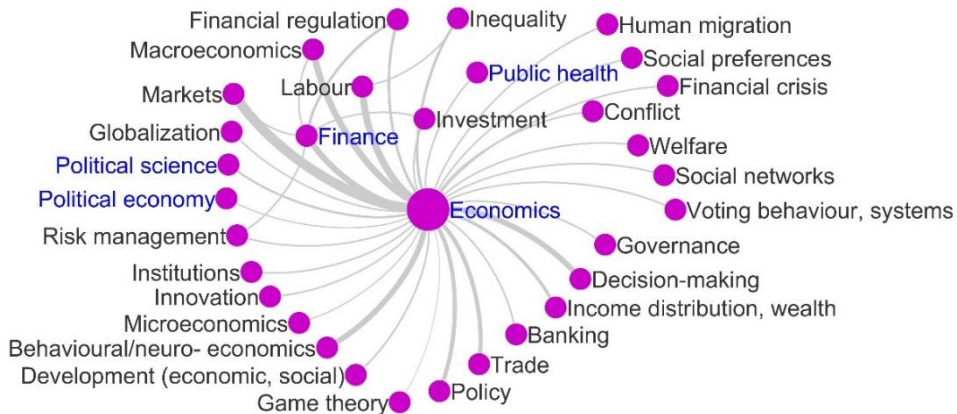

Most-used topics

- *Political economy*, *Markets*, *Labour* and *Behavioural/neuro-economics* grew in use from 2014 to 2020
- *Behavioural/neuro-economics* and *Decision-making* were used more in StG projects compared to those funded in CoG and AdG schemes, while *Macroeconomics* was used more in CoG projects and *Political science* and *Management Financial regulation* in AdG projects
- Around half of the projects in this panel generate methodological developments. *Theoretical analysis*, *Econometrics* and *Computational modelling, simulations* are the main ones

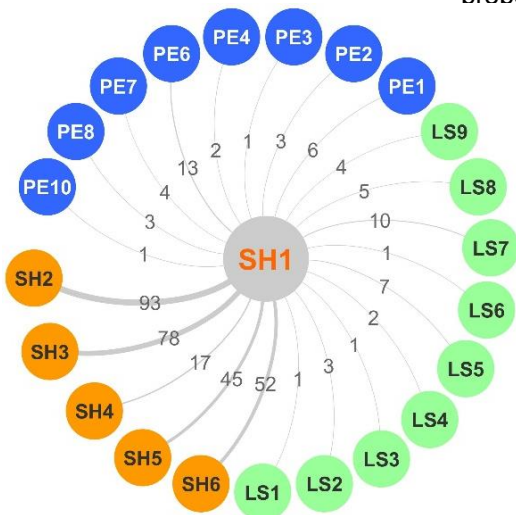

Connections between disciplines and topics in this panel

The strength of the connection between disciplines (blue) and topics (grey) is represented by the thickness of the arcs, which is proportional to the number of times they appear together

Synergies with other panels and domains

The strength of the connections is represented by the thickness of the arcs and the numbers indicated, which are proportional to the number of shared disciplines

- **SH domain:** the main interactions are with the Institutions, Values, Environment and Space (SH2), The Social World, Diversity, Population (SH3) and The Study of the Human Past (SH6) panels through the disciplines *Economics*, *Political science* and *Political economy*
- **PE domain:** the interaction is not very strong, there are no particular panels or disciplines highlighting any synergy
- **LS domain:** the interaction is not very strong, there are no particular panels or disciplines highlighting any synergy

Institutions, Values, Environment and Space (SH2)

This fact sheet provides an overview of the projects funded in the 'Institutions, Values, Environment and Space' panel in the Social Sciences & Humanities (SH) domain (see [ERC panel structure](#)). The projects were funded under the Starting Grant (StG), Consolidator Grant (CoG) and Advanced Grant (AdG) calls launched in the H2020 Framework Programme (2014–2020)*

2975 applications
(5.5% of total)

310 projects funded
(4.7% of total)

150 projects
(€216M)

101 projects
(€189M)

59 projects
(€138M)

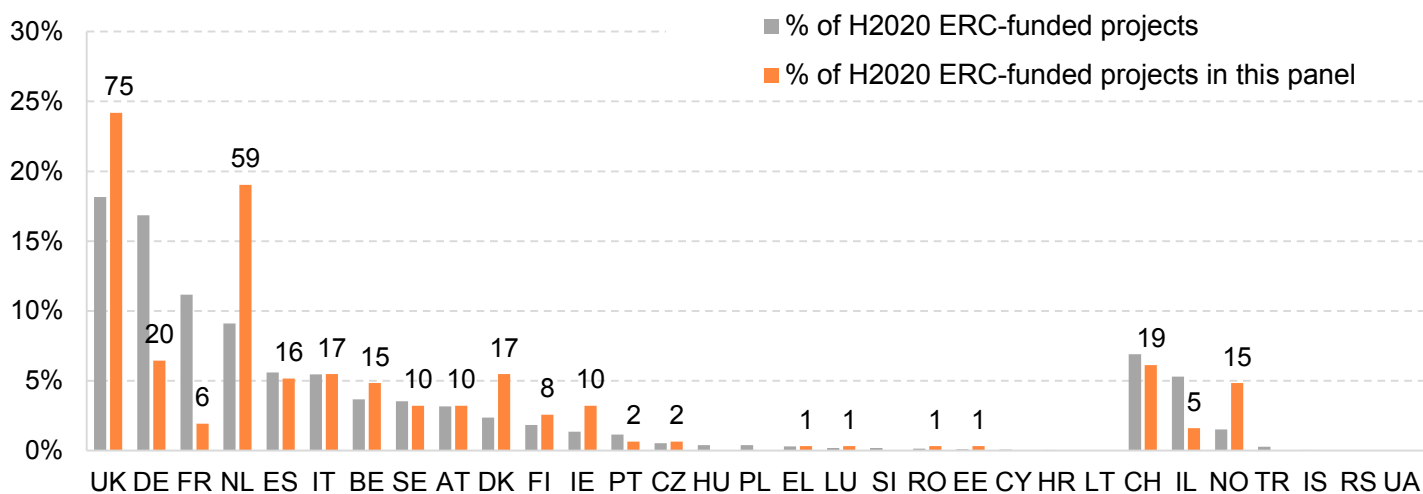

144 female grantees
(46% of grantees in this panel)

€543 million budget

Distribution of ERC-funded projects in EU Member States and Associated Countries in H2020

The 310 funded projects (numbers in the graph) are in 18 EU Member States and 3 Associated Countries (ACs)

Host institutions with ≥7 funded projects

Country of origin of grantees other than EU or ACs (≤3 grouped together)

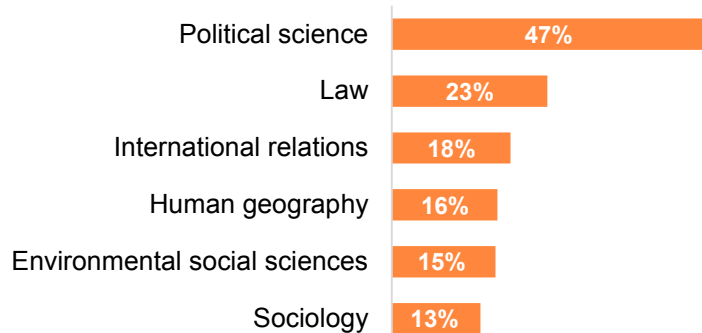

*Data as of December 2021

Scientific landscape of ERC-funded projects in this panel

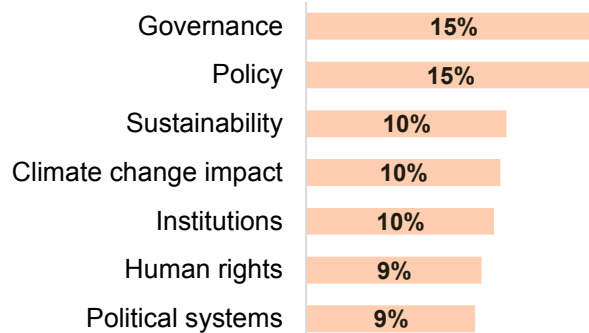

Most-used disciplines

% of projects

Most-used topics

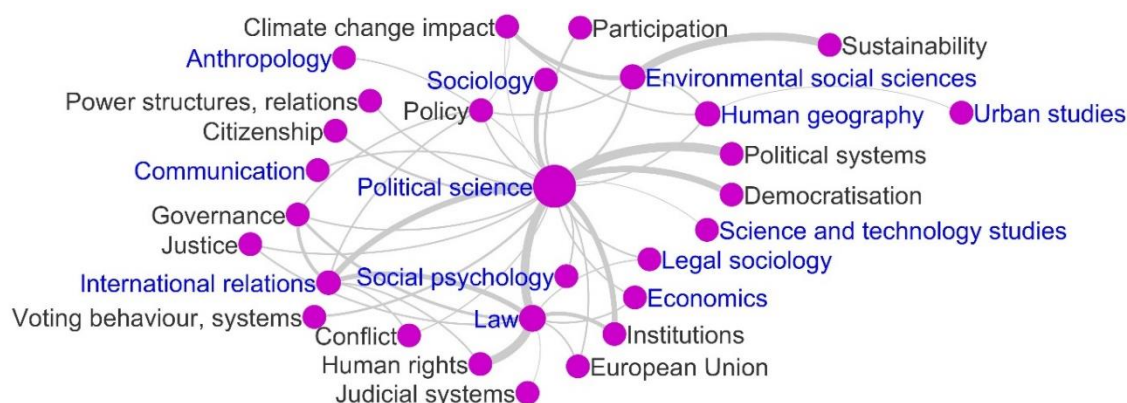

% of projects

- *Human geography*, *Climate change impact* and *Institutions* grew in use from 2014 to 2020
- *Law* and *International relations* were used more in StG projects compared to those funded in CoG and AdG schemes, while *Political science* and *Governance* were used more in AdG projects
- Around 1/4 of the projects in this panel generate methodological developments. *Theoretical analysis*, *Data collection* and *Empirical methods* are the main ones

Connections between disciplines and topics in this panel

The strength of the connection between disciplines (blue) and topics (grey) is represented by the thickness of the arcs, which is proportional to the number of times they appear together

Synergies with other panels and domains

The strength of the connections is represented by the thickness of the arcs and the numbers indicated, which are proportional to the number of shared disciplines

- **SH domain:** the main interactions are with The Social World, Diversity, Population (SH3), The Study of the Human Past (SH6), and Cultures and Cultural Production (SH5) panels through the disciplines *Political science*, *Sociology*, *Human geography* and *Anthropology*
- **PE domain:** the interaction is not very strong, but there are some connections with the Computer Science and Informatics (PE6), and Products and Processes Engineering (PE8) panels through the disciplines *Artificial intelligence* and *Energy*
- **LS domain:** the interaction is not very strong, but there are some connections with the Applied Medical Technologies, Diagnostics, Therapies and Public Health (LS7), Ecology, Evolution and Environmental Biology (LS8), and Applied Life Sciences, Biotechnology, and Molecular and Biosystems Engineering (LS9) panels

The Social World, Diversity, Population (SH3)

This fact sheet provides an overview of the projects funded in the 'The Social World, Diversity, Population' panel in the Social Sciences & Humanities (SH) domain (see [ERC panel structure](#)). The projects were funded under the Starting Grant (StG), Consolidator Grant (CoG) and Advanced Grant (AdG) calls launched in the H2020 Framework Programme (2014–2020)*

2010 applications
(3.7% of total)

245 projects funded
(3.7% of total)

125 projects
(€181M)

76 projects
(€143M)

44 projects
(€103M)

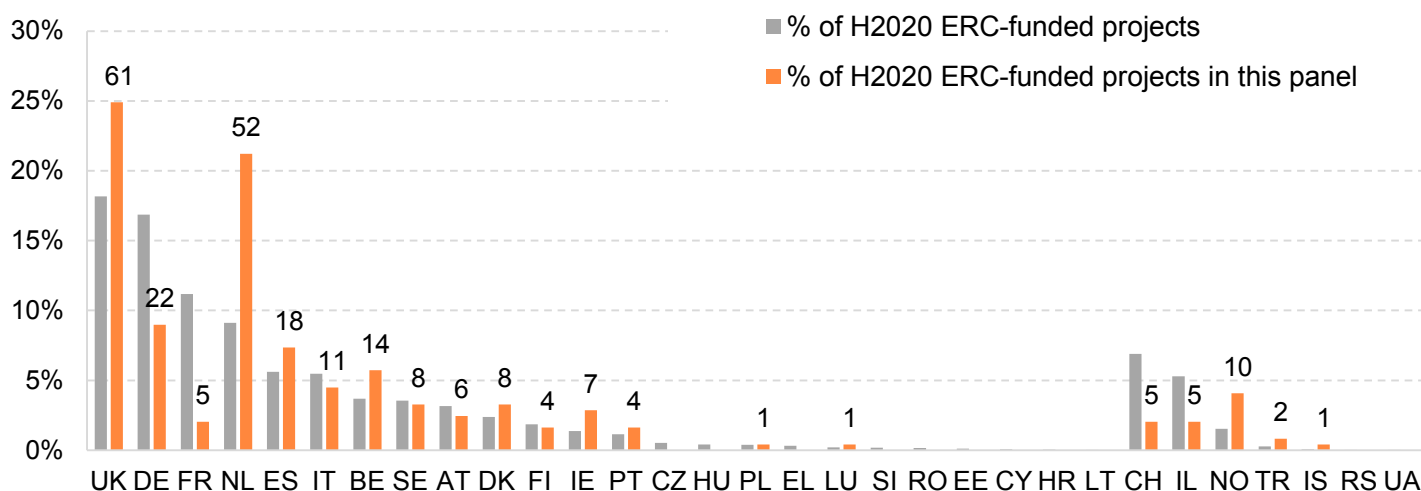

128 female grantees
(52% of grantees in this panel)

€427 million budget

Distribution of ERC-funded projects in EU Member States and Associated Countries in H2020

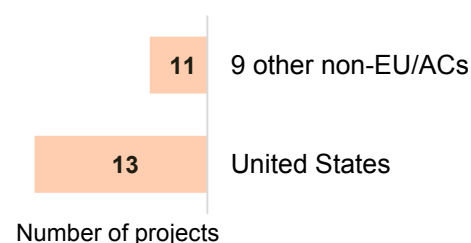

The 245 funded projects (numbers in the graph) are in 15 EU Member States and 5 Associated Countries (ACs)

Host institutions with ≥6 funded projects

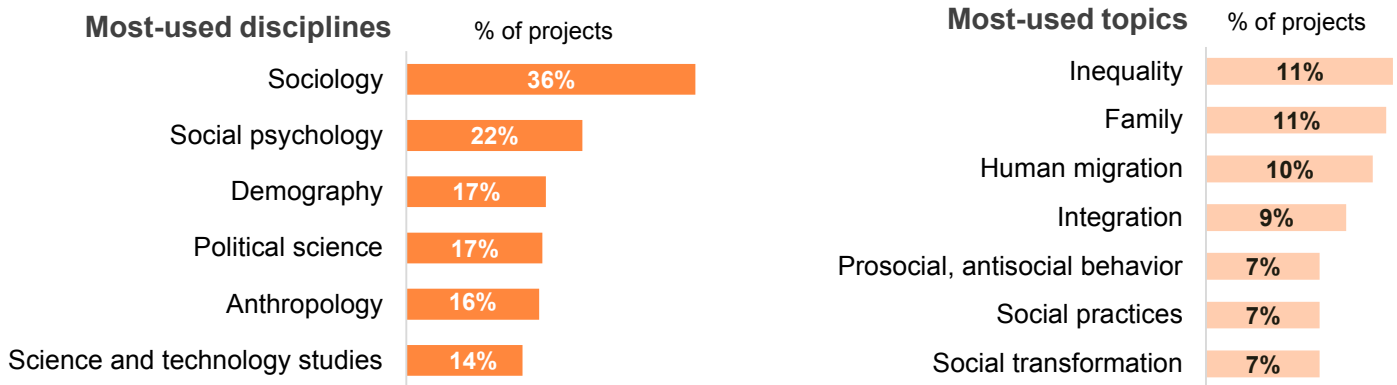

Country of origin of grantees other than EU or ACs (≤3 grouped together)

*Data as of December 2021

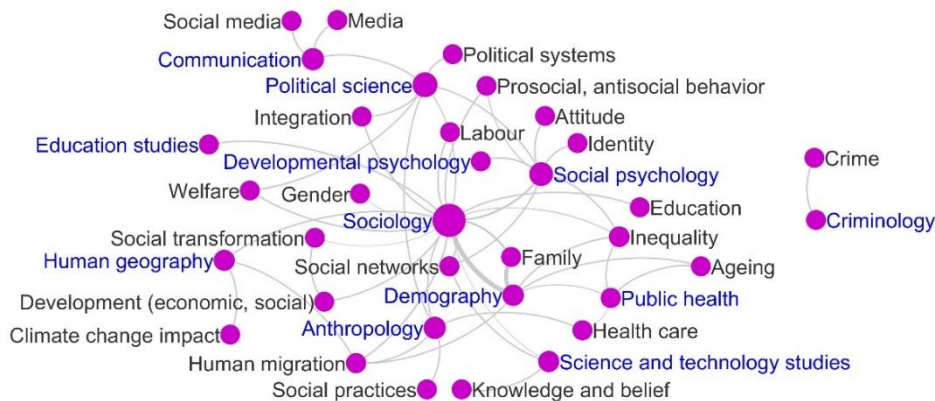

Scientific landscape of ERC-funded projects in this panel

- *Social psychology, Anthropology, and Knowledge and belief* grew in use from 2014 to 2020
- *Science and technology studies* was used more in StG projects compared to those funded in AdG and CoG schemes, while *Family* and *Human migration* were used more in CoG projects and *Sociology* and *Integration* were used more in AdG projects
- Around 1/5 of projects in this panel generate methodological developments. *Digital participatory methods* and *Statistical methods* are the main ones

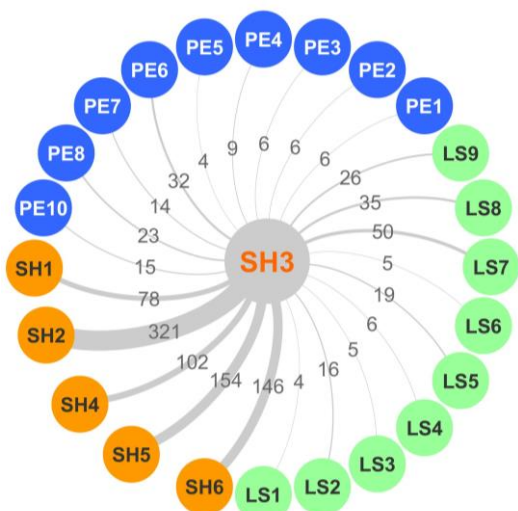

Connections between disciplines and topics in this panel

The strength of the connection between disciplines (blue) and topics (grey) is represented by the thickness of the arcs, which is proportional to the number of times they appear together

Synergies with other panels and domains

The strength of the connections is represented by the thickness of the arcs and the numbers indicated, which are proportional to the number of shared disciplines

- **SH domain:** the main interactions are with Institutions, Values, Environment and Space (SH2), Cultures and Cultural Production (SH5), and The Study of the Human Past (SH6) panels through the disciplines *Political science, Sociology* and *Anthropology*
- **PE domain:** the interaction is not very strong, but there is some connection with the Computer Science and Informatics (PE6) panel
- **LS domain:** the interaction is not very strong, but there is some connection with the Applied Medical Technologies, Diagnostics, Therapies and Public Health (LS7) panel through the discipline *Public health*

The Human Mind and Its Complexity (SH4)

This fact sheet provides an overview of the projects funded in the 'The Human Mind and Its Complexity' panel in the Social Sciences & Humanities (SH) domain (see [ERC panel structure](#)). The projects were funded under the Starting Grant (StG), Consolidator Grant (CoG) and Advanced Grant (AdG) calls launched in the H2020 Framework Programme (2014–2020)*

2583 applications
(4.8% of total)

299 projects funded
(4.5% of total)

139 projects
(€208M)

95 projects
(€185M)

65 projects
(€153M)

109 female grantees
(36% of grantees in this panel)

€546 million budget

Distribution of ERC-funded projects in EU Member States and Associated Countries in H2020

The 299 funded projects (numbers in the graph) are in 14 EU Member States and 3 Associated Countries (ACs)

Host institutions with ≥7 funded projects

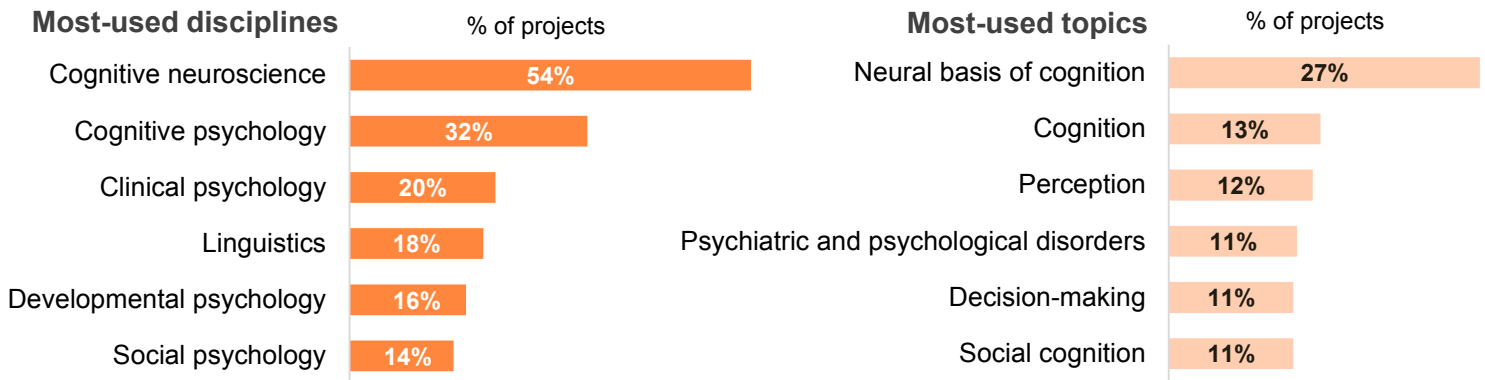

Country of origin of grantees other than EU or ACs (≤3 grouped together)

*Data as of December 2021

Scientific landscape of ERC-funded projects in this panel

- *Cognitive neuroscience*, *Cognitive psychology* and *Cognition* grew in use from 2014 to 2020
- *Cognitive psychology*, *Clinical psychology*, *Perception* and *Decision-making* were used more in StG and CoG projects compared to those funded in AdG scheme, while *Linguistics* was used more in AdG projects
- Around 1/4 of the projects in this panel generate methodological developments. *Computational modelling*, *simulations*, and *Experimental methods in behavior and psychology* are the main ones

Connections between disciplines and topics in this panel

The strength of the connection between disciplines (blue) and topics (grey) is represented by the thickness of the arcs, which is proportional to the number of times they appear together

Synergies with other panels and domains

The strength of the connections is represented by the thickness of the arcs and the numbers indicated, which are proportional to the number of shared disciplines

- **SH domain:** the main interactions are with The Social World, Diversity, Population (SH3), and Cultures and Cultural Production (SH5) panels, and to a lesser extent with the Institutions, Values, Environment and Space (SH2) panel through the disciplines *Social psychology*, *Philosophy* and *Linguistics*
- **PE domain:** the interaction is not very strong, but there is some connection with the Computer Science and Informatics (PE6) panel
- **LS domain:** the main interaction is with the Neuroscience and Neural Disorders (LS5) panel through the discipline *Cognitive neuroscience*

Cultures and Cultural Production (SH5)

This fact sheet provides an overview of the projects funded in the 'Cultures and Cultural Production' panel in the Social Sciences & Humanities (SH) domain (see [ERC panel structure](#)). The projects were funded under the Starting Grant (StG), Consolidator Grant (CoG) and Advanced Grant (AdG) calls launched in the H2020 Framework Programme (2014–2020)*

2421 applications
(4.5% of total)

274 projects funded
(4.1% of total)

109 projects
(€153M)

97 projects
(€185M)

68 projects
(€157M)

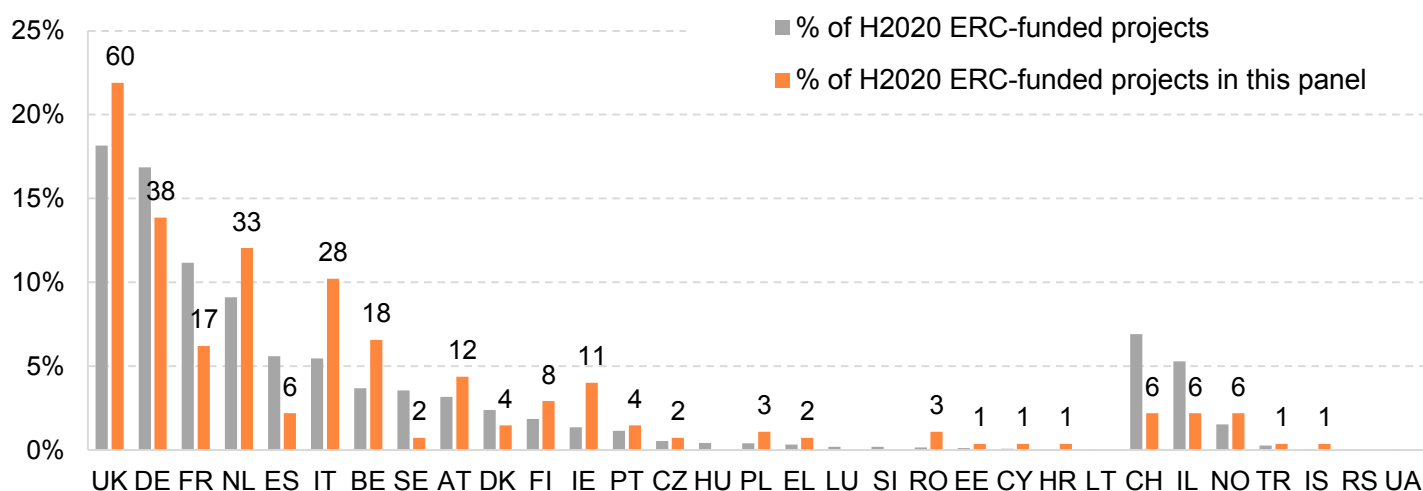

140 female grantees
(51% of grantees in this panel)

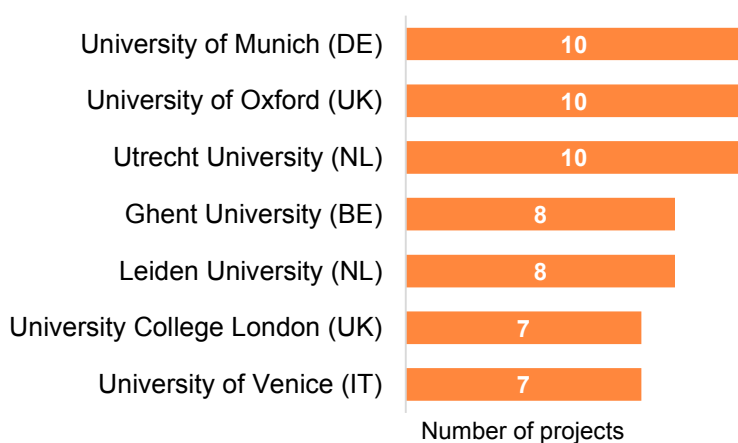

€495 million budget

Distribution of ERC-funded projects in EU Member States and Associated Countries in H2020

The 274 funded projects (numbers in the graph) are in 20 EU Member States and 5 Associated Countries (ACs)

Host institutions with ≥7 funded projects

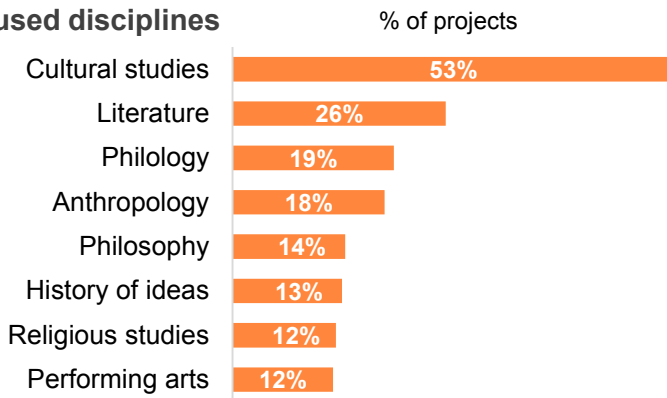

Country of origin of grantees other than EU or ACs (≤3 grouped together)

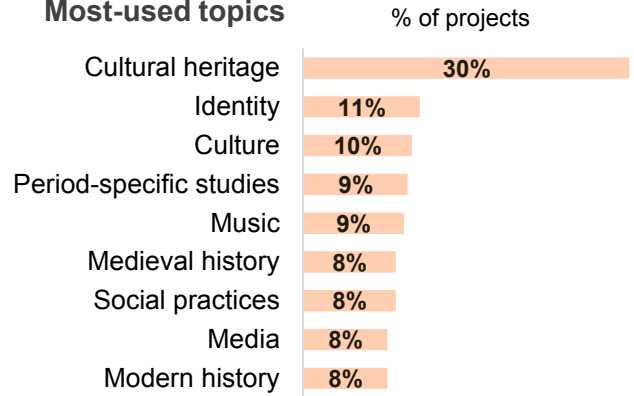

*Data as of December 2021

Scientific landscape of ERC-funded projects in this panel

Most-used disciplines

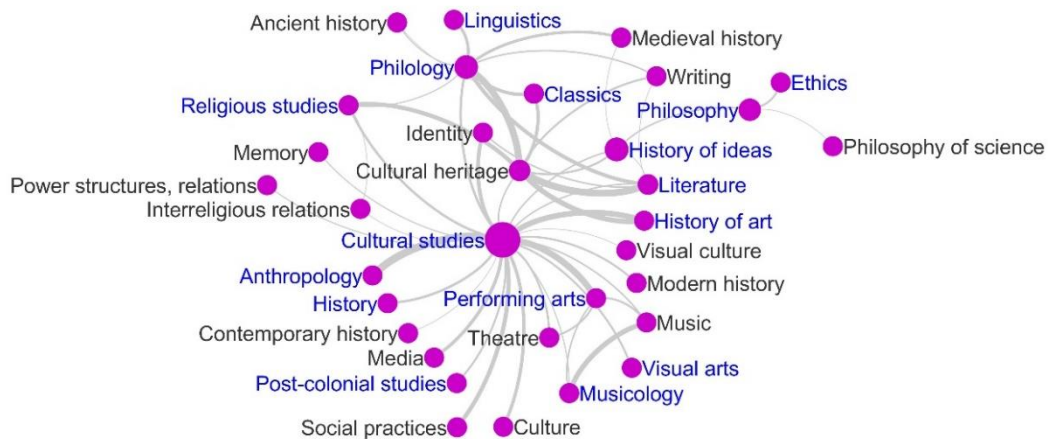

Most-used topics

- *Cultural studies* and *Codicology* grew in use from 2014 to 2020
- *Cultural studies* was used more in StG projects compared to those funded in CoG and AdG schemes, while *Culture* was used more in CoG projects and *Philosophy* and *Identity* were used more in AdG projects
- Around 1/3 of the projects in this panel generate methodological developments. *Digital humanities* and *Comparative methods* are the main ones

Connections between disciplines and topics in this panel

The strength of the connection between disciplines (blue) and topics (grey) is represented by the thickness of the arcs, which is proportional to the number of times they appear together

Synergies with other panels and domains

The strength of the connections is represented by the thickness of the arcs and the numbers indicated, which are proportional to the number of shared disciplines

- **SH domain:** the main interactions are with The Study of the Human Past (SH6), The Social World, Diversity, Population (SH3), and Institutions, Values, Environment and Space (SH2) panels through the disciplines *Anthropology*, *History of ideas* and *Cultural studies*
- **PE domain:** the interaction is not very strong, but there is some connection with the Computer Science and Informatics (PE6) panel
- **LS domain:** the interaction is not very strong, but there are some connections with the Neuroscience and Neural Disorders (LS5), and Applied Medical Technologies, Diagnostics, Therapies and Public Health (LS7) panels

The Study of the Human Past (SH6)

This fact sheet provides an overview of the projects funded in the 'The Study of the Human Past' panel in the Social Sciences & Humanities (SH) domain (see [ERC panel structure](#)). The projects were funded under the Starting Grant (StG), Consolidator Grant (CoG) and Advanced Grant (AdG) calls launched in the H2020 Framework Programme (2014–2020)*

2383 applications
(4.4% of total)

273 projects funded
(4.1% of total)

107 projects
(€155M)

94 projects
(€181M)

72 projects
(€172M)

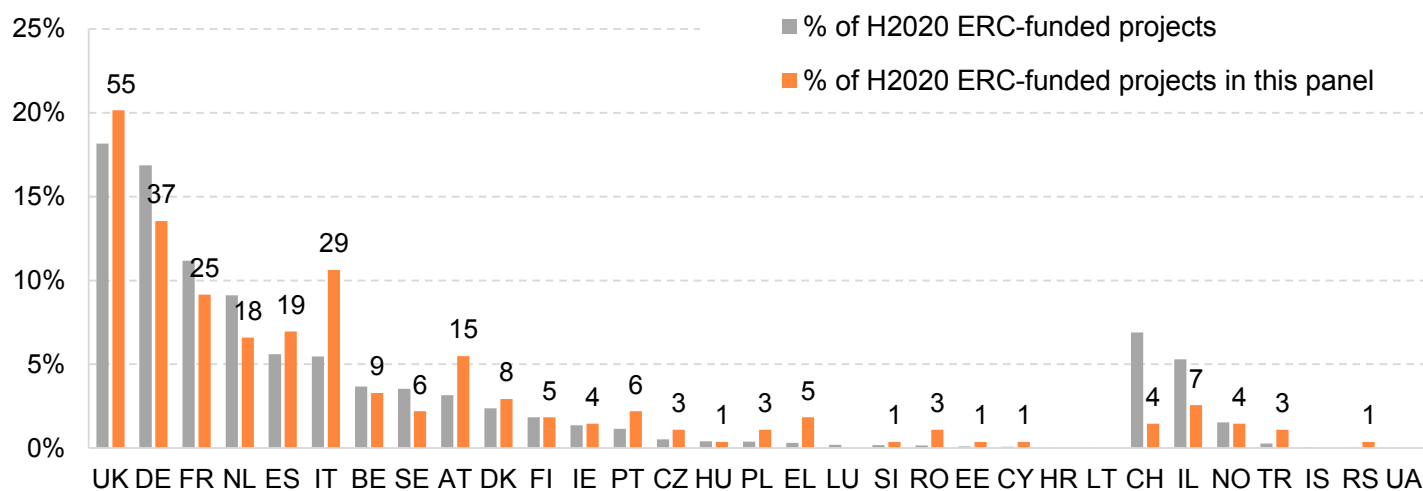

126 female grantees
(46% of grantees in this panel)

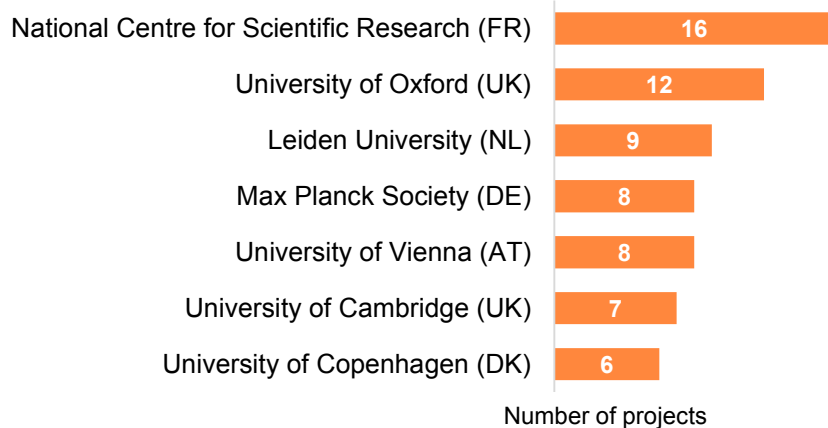

€508 million budget

Distribution of ERC-funded projects in EU Member States and Associated Countries in H2020

The 273 funded projects (numbers in the graph) are in 21 EU Member States and 5 Associated Countries (ACs)

Host institutions with ≥6 funded projects

Country of origin of grantees other than EU or ACs (≤3 grouped together)

*Data as of December 2021

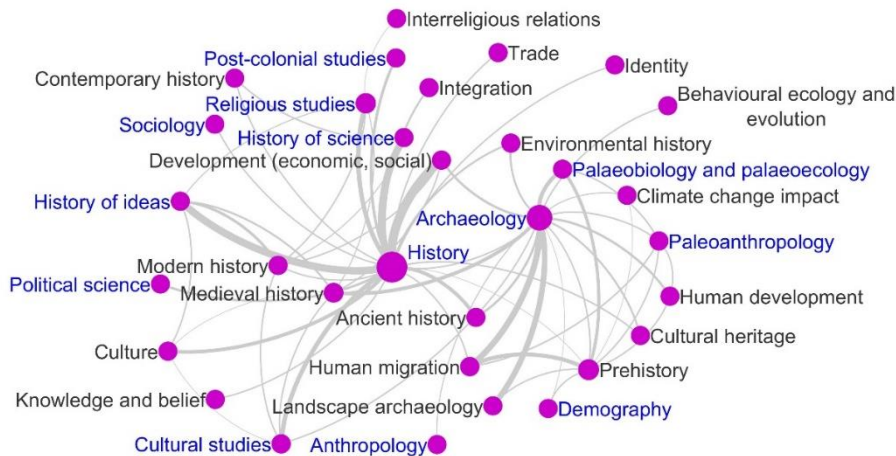

Scientific landscape of ERC-funded projects in this panel

- *Paleoanthropology*, *History of science* and *Landscape archaeology* grew in use from 2014 to 2020
- *Paleoanthropology*, *Prehistory*, *Modern history* and *Contemporary history* were used more in StG projects compared to those funded in CoG and AdG schemes, while *History of science* was used more in AdG projects
- Around 1/3 of the projects in this panel generate methodological developments. *Archival research* and *Archaeological material analysis* are the main ones

Connections between disciplines and topics in this panel

The strength of the connection between disciplines (blue) and topics (grey) is represented by the thickness of the arcs, which is proportional to the number of times they appear together

Synergies with other panels and domains

The strength of the connections is represented by the thickness of the arcs and the numbers indicated, which are proportional to the number of shared disciplines

- **SH domain:** the main interactions are with the Cultures and Cultural Production (SH5), Institutions, Values, Environment and Space (SH2), and The Social World, Diversity, Population (SH3) panels through the disciplines *History of ideas*, *Cultural studies* and *Religious studies*
- **PE domain:** the interaction is not very strong, but there is some connection with the Earth System Science (PE10) panel through the discipline *Palaeobiology and palaeoecology*
- **LS domain:** the interaction is not very strong, but there is some connection with the Ecology, Evolution and Environmental Biology (LS8) panel through the discipline *Palaeobiology and palaeoecology*
